A Legacy of Excellence. A Commitment to Service. A Vision for the Future.

It is my privilege and honour to welcome you to Nair Hospital Dental College and Hospital, Mumbai—an institution whose distinguished journey of more than nine decades stands as a testament to the enduring values of excellence, service, integrity and compassion.

Over the years, Nair Hospital Dental College has evolved into a premier centre of dental education, patient care, research and community service. Its greatest legacy, however, is not measured only by its infrastructure, achievements or academic milestones, but by the generations of students, teachers, clinicians and professionals who have carried its values into society and contributed to the advancement of oral healthcare.

As a government/Corporation institution serving the people of Mumbai and beyond, we carry a profound responsibility. Healthcare is a service, education is a responsibility, and dentistry is ultimately an expression of our commitment to human well-being. Our endeavour is therefore to ensure that every patient who comes to us receives care with dignity, empathy and professionalism, and that every student who enters our institution emerges not only as a skilled dental professional but also as a compassionate and responsible citizen.

The future of dentistry is being shaped by remarkable advances in science and technology—from digital dentistry and precision diagnostics to artificial intelligence, advanced biomaterials and interdisciplinary healthcare. We must embrace these innovations while remaining firmly anchored in the timeless principles of ethical practice, evidence-based care and human connection.

Our vision is to build an institution where tradition and innovation walk together, where academic excellence is inseparable from ethical responsibility; where research translates into meaningful solutions; and where quality dental care is accessible and affordable to every section of society.

We are committed to nurturing an academic environment that encourages curiosity, critical thinking, creativity and lifelong learning. We aspire to strengthen research and innovation, expand community outreach and preventive oral healthcare, and continuously improve the quality and accessibility of patient-centred clinical services.

As India moves towards a healthier and more developed future, dental health must become an integral part of the national healthcare vision. Nair Hospital Dental College seeks to contribute to this journey by developing competent professionals, advancing knowledge, promoting preventive healthcare and serving society with compassion and excellence.

The institution belongs not only to those who study or work here, but also to the countless patients who have entrusted their health to us, the alumni who carry its name across the world, and the communities whose lives we touch through our service.

As we honour our illustrious past, we must also have the courage to envision the future.

Our legacy gives us our foundation.

Our values give us our direction.

Our students give us our hope.

And our service to society gives us our purpose.

Together, let us carry the proud legacy of Nair Hospital Dental College forward—from excellence to excellence, from service to greater service, and from a distinguished past towards an even more transformative future.

I warmly welcome you to our institution and invite you to discover the spirit, scholarship, service and human values that define Nair Hospital Dental College and Hospital.

Romala
